Husein Sastranegara, Cicendo, Kota Bandung

A Computer Systems graduate with a strong interest in software development and data analysis. Possesses experience in programming, networking, and developing projects related to IoT and machine learning. Familiar with Python, databases, and system design. A responsible and motivated individual who is eager to learn new technologies and contribute effectively in a professional work environment.

Work Exprerience

PT Citra Global Prospexindo — Bandung, Indonesia Oct 2024 – Dec 2024

Project Admin

- Performed data entry and verification of TOEIC test reports (Berita Acara)
- Coordinated with multiple schools for document collection and administration
- Ensured accuracy and completeness of administrative documentation
- Supported smooth project operations and reporting processes

CBT TOEIC — Bandung, Indonesia Dec 2023

Technician

- Installed and configured TOEIC test applications
- Troubleshot and resolved technical issues (errors and bugs) during test sessions
- Ensured smooth operation of the system to support test participants

Education Level

Indonesian Computer University — Bandung, Indonesia Sep 2021 – April 2026
Bachelor of Computer Systems | GPA: 3.41

- Developed a line follower robot using microcontroller programming
- Built a web-based warehouse management system with CRUD functionality using PHP and MySQL
- Developed an Arduino-based robotic gripper control system integrated with an Android application
- Final Project: Developed a weather prediction model using LSTM based on environmental sensor data

Pondok Pesantren Wali Barokah (PPWB) — Kediri, Indonesia 2018-2021

- Completed Islamic boarding school education with strong foundation in Quran, Hadith, and Islamic studies
- Developed discipline, communication skills, and strong moral values through boarding school education

Skill, Achievement & Other Experience

- Tehcniacal : Python, Machine Learning(LSTM), Data Preprocessing, SQL, PHP, Sensor and Arduino IDE
- Language : Indonesia (Fluent), English (Basic)

Project

Final Project — Weather Prediction System Using LSTM `` 2026

- Designed and developed a time-series classification model using LSTM.
- Processed and analyzed environmental sensor data including temperature, humidity, wind speed, and rainfall.
- Implemented data preprocessing and normalization to improve model performance.
- Integrated the trained model into a user interface using Streamlit and Tkinter.
- Evaluated model performance using classification metrics such as Accuracy, Precision, Recall, and F1-Score.

Certifications

CCNA : Introduction to Network 2024

- Credential ID : b402ce08-ccbb-43c8-9352-1a05d0daa864
- Skills : Access Connectivity, Access Security, High Availability, IP Services, Routing & Switching, Wireless LAN

Mobile Phone Service Training — Dinas Ketenagakerjaan Kota Bandung Feb 2023

- Learned basic mobile phone troubleshooting and repair
- Understanding of hardware components and maintenance
